MESSAGE

I have immense pleasure to know that the Department of Computer Science & Applications, SCSVMV is organizing the DST Sponsored National Conference on "Applications of Data Mining in National Security" on 30th & 31st August 2010 and releasing a book on the conference proceedings.

Any new discovery has its own merits and demerits. On one side the technological development brings comfort to human life, which is the prime objective. On the other side, it also brings lot of trouble to the society. It is also difficult to arrest the same immediately. Such problems are always created by immature and evil minds. It is also quite natural that on contrary the intellect will always think about prosperity of the society. This seminar is such an important step in the search to develop a solution for the national problem of terrorist activities through technology. I hope this type of co-operative effort by the experts participating in this seminar will definitely yield fantastic results including development of software that would be ideally suited for our applications in National security.

I wish all success for the efforts.

Prof. Dr. V.S. Vishnu Potty
