Enathur Kanchipuram - 631561

Prof. Dr. Vishnu Potty V.S.
Vice-Chancellor (Officiating)

MESSAGE

Power, not only in absolute but also in relative terms, is the essential base upon which industrial, economic, commercial, ecological and even political activities do happen and the world community keeps moving on towards progress. An unexpected disruption of supply, in any manner whatsoever, affects entire nations, down to the level of a common man. The scenario being so critical, experts and engineers in this area have a permanent challenge to meet out the eventualities and restore quick connectivity thereby averting all possible risks. The future beholds even more complex situations as digitization of data communication and power distribution management gets technically advanced every day.

The intended national conference on "Power System Emergencies" being organized by our Electrical and Electronics Engineering Department would bring out concept papers, papers on practical solutions for emergency situations and highlight new challenges that may emerge because of technological advancement.

I am confident that the culmination of this conference would be the encouragement to the participants to get in to newer horizons of research in this field. I wish the function a very grand success.

Vishnu Potty V.S.

MESSAGE

This is very delightful moment for me to know that the Department of Electrical and Electronics Engineering is going to organize a Conference on the theme 'POWER SYSTEM EMERGENCIES' on 12.12.2013. This is a second national conference in their department.

Present topic is absolutely needful to be discussed in present day situation of India.

My best wishes to the EEE Department and the team members of organizing committee under the co-ordinatership of Dr.M.Rathinakumar for their efforts to make this conference a successful one.

Prof. Dr. G. Srinivasu,
Registrar.
