Vision of **SCSVMV** University

The true purpose of education is to prepare a student mind to find harmony with the culture of the land and mould the students into noble human beings with strong character, warmth and compassion. Enabling students to acquire knowledge in class rooms and technical skills in laboratory is just a necessary but not sufficient condition for student development. What is more important is to identify the innate talent of students and bring out their hidden potentialities to purpose for all round personality development, which will stand by them, in serving the society with responsibility and commitment later in career. Accent is on the fusion of Eastern thought and Western methodology in education. This is the Vision of our Mahavidyalaya, which bears a unique stamp of identity.
