

# APPLIED CHEMISTRY

A detailed microscopic image showing a dense field of cells. The cells are primarily spherical and greenish-yellow. Interspersed among them are numerous bright orange, filamentous structures that resemble bacteria or specialized cells. The background is a warm, brownish-orange gradient.

Dr. K. SIVAKUMAR

Since 1982

A microscopic image showing a cluster of cells. Some cells are green and spherical, while others are purple and more irregular in shape. The background is dark, making the cells stand out.

## FOREWORD

It is indeed an appreciable effort to bring out a textbook on applied chemistry. This book covers the various aspects of applied chemistry in detail. The subject has been dealt in a proper sequence as the division of subject matter has been done systematically. The content is presented in a clear, lucid and logical manner.

The solved problems, short answers and summary at the end of every chapter have been illustrated nicely. The book has been written in a simple language making every one feel comfortable.

I am of the opinion that this textbook is an excellent resource to engineering and technology students for curricular purpose as well as a commendable reference book. I firmly believe that the learners will find this material useful to read, recollect and review.

I whole-heartedly congratulate the author for this successful venture

**Prof. Dr. A. Ravi**
