3. Research scholar : M.A.ARCHANA
Research Topic : Improving the Performance of Throughput in Multihop Wireless Mesh Networks.
Synopsis

Topic of Research Colloquium is an overview of the improvement of throughput in multihop wireless mesh networks. In this presentation she discussed on the taxonomy of wireless networks, introduction about Single hop, Multihop Techniques, Wireless Mesh networks, their advantages. She also discussed about the different algorithms for throughput enhancement. The proposed model is much useful in the areas of Broadband Networking, Enterprise Networking, Metropolitan Networking and also in Military Communications.

4. Research Colloquium was organized by A.Rajasekaran, Assistant Professor, ECE department.
