Research Topic : QoS based Robust Routing Protocol for Wireless Multimedia Sensor Network

Synopsis : Topic of Research Colloquium is an overview of the QoS based Robust Routing Protocol for Wireless Multimedia Sensor Network. In this presentation, she discussed about the Wireless Multimedia Sensor Network architecture and its applications. The presentation gave an overview of Hexnode RPAR framework is adopted in combination with cross layer architecture by minding hole bypassing good flexibility and high communication efficiency for real time video signal. She also discussed about simulated output by using OMNET. The proposed model is much useful for improving the lifetime of the WMSN.
