

SRI CHANDRASEKHARENDRA SARASWATHI VISWA MAHAVIDYALAYA

(SCSVMV)

(Deemed to be University u/s 3 of the UGC Act 1956) (Accredited with 'A' Grade by NAAC) Enathur, Kanchipuram - 631 561.

Programme Name:	Computer Science Engineering
Programme Code:	BE

PSOs (Programme Specific Outcome)

Name of the Programme	PSO Statement
Computer Science Engineering	PSO 1.Model Computational Problems by applying mathematical
	concepts and design solutions using suitable data structures and
	algorithmic techniques
	PSO 2.Design and develop solutions by following standard software
	engineering principles and implement by using suitable programming
	language and platforms
	PSO 3.Develop system solutions involving both hardware and
	software modules

PEOs (Programme Educational Objectives)

Name of the Programme	PEO Statement
Computer Science Engineering	PEO. 1: Provide engineering insight to problem solving to succeed in
	Technical Profession through precise education and to prepare students
	to excel in postgraduate programs.
	PEO. 2: To provide students with fundamental knowledge and ability
	to expertise in Computer Science and Engineering.
	PEO. 3: Prepare students with good scientific and engineering breadth
	so as to analyze, design and create products, solutions to problems in
	the area of Computer Science and Engineering.
	PEO. 4: To inculcate in students professional, effective communication
	skills, team work, multidisciplinary approach and an ability to relate
	engineering issues to broader social context.

SRI CHANDRASEKHARENDRA SARASWATHI VISWA MAHAVIDYALAYA

(SCSVMV)

(Deemed to be University u/s 3 of the UGC Act 1956) (Accredited with 'A' Grade by NAAC) Enathur, Kanchipuram - 631 561.

PEO. 5: Prepare students to be aware of excellence, leadership, written
ethical codes and guidelines and lifelong learning needed for
successful professional career by providing them with an excellent
academic environment.

COs (Course Outcomes)

S.No	Course Code	Course Name	Course	e Outcome
1	CESCS18T40	Programming for Problem Solving	[1]	Makes students gain a broad perspective about the uses of computers in the engineering industry
			[2]	Develops a basic understanding of computers, the conept of algorithm and algorithmic thinking
			[3]	Develops the ability to analyze a problem, develop an algorithm to solve it
			[4]	Develops the use of the C programming language to implement various algorithms and develop the basic concepts and terminology of programming in general
			[5]	Introduces the features of data structures in this C programming language
2	BCSF183T20	Digital Electronics	[1]	Understand the basic number system and Boolean Algebra
			[2]	Understand the basics of combinational and sequential circuits
			[3]	Understand the concepts of VHDL programming for designing Digital circuits
3	BCSF183T30	Data Structures and Algorithms	[1]	Able to analyze the algorithms to determine the time and computation complexity and justify the correctness
			[2]	Implement search problems, problem of stacks, queue and linked list.
			[3]	Student will able to write an algorithm Selection Sort, Bubble Sort, Insertion Sort, Quick Sort, Merge Sort, Heap Sort and compare their performance in term of Spaceand Time complexity
			[4]	Student will able to implement Graph search and traversal algorithms and determine the time and computation complexity.
4	BCSF183T40	Object Oriented Programming using C++	[1]	Articulate the principles of object-oriented simple abstract data types, control flow and design implementations, using abstraction functions to

SRI CHANDRASEKHARENDRA SARASWATHI VISWA MAHAVIDYALAYA

(SCSVMV)

				1 1
			[2]	document them. Outline the essential features of object-oriented programming such as encapsulation, polymorphism,
				inheritance, and composition of systems based on object identity using class and object.
			[3]	Apply the object using constructors and destructors
				and using the concept of polymorphism to implement compile time polymorphism in programs by usingoverloading methods and operators.
			[4]	Use the concept of inheritance to reduce the length of code and evaluate the usefulness.
			[5]	Apply the concept of run time polymorphism by
				using virtual functions, overriding functions and abstract class in programs.
			[6]	Use I/O operations and file streams in programs and
				by applying the concepts of class and objects using Generic types, error handling and STL
			[7]	Analyze problems and implement simple C++ applications using an object-orientedprogramming
				approach.
			[8]	Name and apply some common object-oriented design patterns and give examples of their use.
5	CBSMA18T10	Discrete	[1]	Express a given logical sentence in terms
		Mathematics	[2]	ofpredicates, quantifiers, and logical connectives. Derive the solution for a given a problem using
				deductive logic and prove the solution based
				onlogical inference and classify its algebraic structure.
			[3]	Evaluate Boolean functions, simplify expressions the properties of Boolean algebra
			[4]	Develop the given problem as graph networks
6			F 1 1	and solve with techniques of graph theory
6	BCSF184T20	Computer Organization and	[1] [2]	An ability to design the arithmetic and logical unit. An ability to implement different types of control
		Architecture	r_1	and the concept of I/O andpipelining Techniques.
			[3]	An ability to select appropriate computer systems for given application domains forfuture design of
				given application domains forfuture design of computer architecture.
			[4]	Understand and develop processor for future
				computing hardwires to solves theproblems of highend computing applications.
			[5]	Imparting training to the students to able to design
				new computer architecture of their own so that it
				could be solve the computer stakeholder problems in

SRI CHANDRASEKHARENDRA SARASWATHI VISWA MAHAVIDYALAYA

(SCSVMV)

			[6]	future. An ability to understand and design the various parallel processor model andarchitecture for design of futures processor models
7	BCSF184T30	Microprocessor and Microcontroller	[1]	Understand block diagram, interrupt structure of 8086 and other processor configurations
			[2]	Interface ICs like 8255 PPI, 8279 Display and Keyboard Interface, ProgrammableInterrupt controller and DAM Controller
			[3]	Develop simple programs with Basic Arithmetic Functions, String functions and Array
			[4]	Understand block diagram of 8051, Memory organization, counters and interrupt structure in 8051
			[5]	Develop simple programs in Arithmetic Function, Interfacing with motor and display devices
			[6]	Understand the block diagram and fundamentals of ARM processor, Thumb Instruction set.
8	BCSF184T40	Design and Analysis of Algorithms	[1]	For a given algorithms analyze worst-case running times of algorithms based on asymptotic analysis and
			[2]	justify the correctness of algorithms. Describe the greedy paradigm and explain when an algorithmic design situation calls for it. For a given problem develop the greedy algorithms.
			[3]	Describe the divide-and-conquer paradigm and explain when an algorithmicdesign situation calls forit. Synthesize divide-and-conquer algorithms.Derive and solve recurrence relation.
			[4]	Describe the dynamic-programming paradigm and explain when analgorithmic design situation calls for it. For a given problems of dynamicprogramming and develop the dynamic programming algorithms, and analyze it to determine its computational complexity.
			[5]	For a given model engineering problem model it using graph and write the corresponding algorithm to solve the problems.
			[6]	Explain the ways to analyze randomized algorithms (expected running time, probability of error).
			[7]	Explain what an approximation algorithm is. Compute the approximation factor of an approximation algorithm (PTAS and FPTAS).
9	BCSF185T0	Automata Theory	[1] [2]	Design of digital circuits. Design of Lexical analyzer

SRI CHANDRASEKHARENDRA SARASWATHI VISWA MAHAVIDYALAYA

(SCSVMV)

г			1		
				[3]	Designing software for identifying the words, phrases and other patterns in largebodies of text.
				[4]	To write software for processing the natural language.
				[5]	To apply in Artificial Intelligence and knowledge
					engineering, in game theory andgames, computer
-	10	BCSF185T20	Operating Systems	[1]	graphics, linguistics etc.,
	10	DC5F165120	Operating Systems	[1]	Describe and explain the fundamental components of a computer operating system.
				[2]	Define, restate, discuss, and explain the policies for
					scheduling, deadlocks,memory management,
				[2]	synchronization, system calls, and file systems.
				[3]	Describe and extrapolate the interactions among the various components of computing systems.
				[4]	Design and construct the following OS components:
				L · J	System calls, Schedulers, Memory management
					systems, Virtual Memory and Paging systems.
	11	BCSF185T30	Programming in	[1]	Use an appropriate concepts OOP as well as the
			JAVA		purpose and usage principles of Inheritance,
					polymorphism, encapsulation and method
					overloading for developing and Implementing required software to satisfy the customer's needs
				[2]	Apply the concept of class, Objects, Collections
				[-]	classes for creating and using theappropriate
					software to meet the customers demand
				[3]	Design and Implement the concept of package for
					API reusability to reduce thesoftware development
					time and increase the efficiency of delivering software's ontime to the customers.
				[4]	Use the file reading and writing concepts to
				[+]	implements various softwareapplications
				[5]	Implement the applications by using java API
					concepts and testing and debuggingtools to
					automatically discover errors of Java programs as
					well as use versioningtools for collaborative
				[6]	programming/editing
				[6]	Design and Implementation of Connecting java with Databases to provide thesolutions to the customers in
					N-Tier business software models to maintain
					theorganizational information's effectively
				[7]	Design and implements the concept of GUI based
					software applications usingappropriate GUI API
		DCCE105T40	Databasa	F11	$\mathbf{T}_{\mathbf{n}} \mathbf{d}_{\mathbf{n}} \mathbf{u} \mathbf{d}_{\mathbf{n}} \mathbf{d}_{\mathbf{n}}$
	12	BCSF185T40	Database Management	[1]	Understand database concepts, E R model and relational model

SRI CHANDRASEKHARENDRA SARASWATHI VISWA MAHAVIDYALAYA

(SCSVMV)

		Systems	[2]	Understand the structures of SQL and query language, processing. Apply the SQL and PL/SQL programming with SQL table, views and Embedded SQL
			[3]	Understand Functional Dependency, apply various normalization techniques.Perform SQL queries related to Transaction Processing & Locking using conceptof Concurrency control and recovery.
			[4]	Understand the principles of storage structure and understand advanced storagemechanism.
			[5]	Understand how to secure the designed database and to know the various database
13	BCSF186T10	Compiler Design	[1]	Explain the concepts and different phases of compilation with compile time errorhandling and represent language tokens using Regular expressions.
			[2]	Context free grammar and finite automata and design lexical analyzer for a language.Compare top down with bottom up parsers, and develop appropriate parser toproduce parse tree representation of the input.
			[3]	Design syntax directed translation schemes for a given context free grammar.Generate intermediate code for statements in high level language.
			[4] [5]	Apply optimization techniques to intermediate code Generate machine code for high level language program.
14	BCSF186T20	Computer Networks	[1]	Explain the functions of the different layer of the OSI Protocol.
			[2]	Draw the functional block diagram of wide-area networks (WANs), local areanetworks (LANs) and Wireless LANs (WLANs) describe the function of each block.
			[3]	For a given requirement (small scale) of wide-area networks (WANs), local areanetworks (LANs) and Wireless LANs (WLANs) design it based on the marketavailable component
			[4]	For a given problem related TCP/IP protocol developed the network programming.
			[5]	Configure DNS DDNS, TELNET, EMAIL, File Transfer Protocol (FTP), WWW,HTTP,SNMP, Bluetooth, Firewalls using open-source available software and tools.
15	BCSF186T30	Object Oriented Analysis and Design	[1]	Use a rational rose framework and explore its capabilities

SRI CHANDRASEKHARENDRA SARASWATHI VISWA MAHAVIDYALAYA

(SCSVMV)

			[2]	Apply appropriate method of diagrammatic techniques.
			[3]	Design and implement innovative features in a development process.
			[4]	Design and implement a recommender system.
			[5]	Examine the performance of UML with various
				diagrammatic presentations.
16	BCSF187T40	Computational Biology	[1]	knowledge and awareness of the basic principles and concepts of biology, computer science and mathematics
			[2]	Problem-solving skills, including the ability to develop new algorithms and analysismethods.
			[3]	An understanding of the intersection of life and
				information sciences, the core ofshared concepts,
				language and skills the ability to speak the language
				of structurefunction relationships, information theory and database queries
17	BCSF185EA0	Software	[1]	Basic knowledge and understanding of the analysis
		Engineering	[-]	and design of complex systems.
			[2]	Ability to apply software engineering principles and
				techniques.
			[3]	Design and implement innovative features in a
18	BCSF185EB0	Internet of Things	[1]	development process. Understand the concepts of Internet of Things
10	Desi iosebo	internet of Things	[2]	Analyze basic protocols in wireless sensor network
			[2]	Design IoT applications in different domain and be
			[4]	able to analyze theirperformance Implement basic IoT applications on embedded
			נדן	platform
19	BCSF185EC0	Machine Learning	[1]	Apply the apt machine learning strategy for any given problem
			[2]	Suggest supervised, unsupervised or semi-supervised learning algorithms for anygiven problem
			[3]	Design systems that use the appropriate Trees in Probabilities Models of machinelearning
			[4]	Modify existing machine learning algorithms to improve classification efficiency
			[5]	Design systems that use the appropriate graph models of machine learning
20	BCSF185ED0	Information Theory and Coding	[1]	Design the channel performance using Information
			[2]	theory Understand and Comprehend various error control
				code properties

SRI CHANDRASEKHARENDRA SARASWATHI VISWA MAHAVIDYALAYA

(SCSVMV)

			[3]	Apply linear block codes for error detection and
				correction
			[4]	Apply convolution codes for performance analysis & cyclic codes for error detection and correction
			[5]	Design and understand about compression techniques with various Channelperformance
				techniques
21	BCSF185EF0	Cloud Infrastructure and Services	[1]	To explain the core concepts of the cloud computing paradigm: how and why this paradigm shift came about, the characteristics, advantages and challenges brought about by the various models and services in cloud computing.
			[2]	To apply the fundamental concepts in datacenters to understand the tradeoffs inpower, efficiency and cost by Load balancing approach.
			[3]	To discuss system virtualization and outline its role in enabling the cloud computingsystem model.
			[4]	To analyze various cloud programming models and apply them to solve problems on the cloud.
			[5]	To analyze the billing of resources and other
			[6]	paradigm: how to deal with disasters. To deploy applications over commercial cloud
			[0]	computing infrastructures such asAmazon
22	BCSF186EI0	Cryptography and Network Security	[1]	1. Understand the knowledge about network security services and mechanisms.
			[2]	Analyse about Symmetrical and Asymmetrical cryptography.
			[3]	Analyse and Understand about the concept of Data integrity, Authentication, DigitalSignatures.
			[4]	Analyze about Various network security applications, IPSec, Firewall, IDS, Web security, Email security, and Malicious software etc.
			[5]	Understand the security issues involved with different Network operating systems
23	BCSF186EG0	Dataware housing and Mining	[1]	Design a Data warehouse system and perform business analysis with OLAP tools.
			[2]	Apply suitable pre-processing and visualization techniques for data analysis
			[3]	Create simple data mining applications using various functionalities of data mining
			[4]	Apply frequent pattern and association rule mining
			[5]	techniques for data analysis Apply appropriate classification and clustering
l		I	[-]	ripping appropriate classification and clustering

SRI CHANDRASEKHARENDRA SARASWATHI VISWA MAHAVIDYALAYA

(SCSVMV)

				techniques for data analysis.
24	BCSF187EK0	Advanced Computer Architecture	[1]	Apply the concept of Parallel processor architecture in designing a moderncomputer for the future customers needs
			[2]	Apply the parallel and Multicore architecture in higher education for designing amodern computer architecture
			[3]	Apply and Develop a software for the appropriate modern computer architecturethrough understanding parallel and multicore computer architecture
			[4]	Use the various parallelism architecture techniques and apply for their research area in future perspectives
25	BCSF187EL0	Big Data Analytics	[1]	Big Data Analytics will give ability to a student to communicate computer scienceconcepts, designs, and solutions effectively and professionally among the researchgroups.
			[2]	This course is aimed to offer training which prepare students to embark on Big DataAnalytics careers which is one of the fastest growing technologies. They are alsoprovided a very good foundation for further research analysis work
			[3]	further research analysis work. Analyze InfosphereBigInsights Big Data Recommendations and access with processdata on Distributed File System
			[4]	Prepare and equip students for opportunities in ever changing technology withhands-on industrial training.
			[5]	The Syllabus also develops requisite professional skills and problem-solving abilities for pursuing a career in Software Industry.
26	BCSF187EO0	Artificial Intelligence	[1]	Exhibit strong familiarity with a number of important AI techniques, including inparticular search, knowledge representation, and planning and constraintmanagement.
			[2]	Interpret the modern view of AI as the study of agents that receive percepts from the environment and perform actions.
			[3]	Build awareness of AI facing major challenges and the complexity of typical problems within the field.
			[4]	Assess critically the techniques presented and apply them to real world problems.
			[5]	Develop self-learning and research skills to tackle a topic of interest on his/her ownor as part of a team.

SRI CHANDRASEKHARENDRA SARASWATHI VISWA MAHAVIDYALAYA

(SCSVMV)

27	BCSF187EM0	Blockchain Technology	[1]	Familiarize the functional/operational aspects of cryptocurrency ECOSYSTEM.
		reemology	[2]	Understand emerging abstract models for Blockchain
			[3]	Technology. Identify major research challenges and technical
				gaps existing between theory and practice in
29	DOCE107ENO	Data dia Dava ang	F 1 1	cryptocurrency domain.
28	BCSF187EN0	Robotic Process Automation	[1]	Learn the basic concepts of Robotic Process Automation
			[2]	Understand processes which can be automated, associated business documentation basics, RPA journey of an organization
			[3]	Develop familiarity and deep understanding of UiPath tools
			[4]	Develop ability to independently design and create robots for business processes
			[5]	Design basic and simple chat bots
29	BCSF188EQ0	Advanced Operating	[1]	Discuss the various synchronization, scheduling and
		Systems		memory management issues.
			[2]	Demonstrate the Mutual exclusion, Deadlock
				detection and agreement protocols of distributed
			[3]	operating system. Discuss the various resource management techniques
			[5]	for distributed systems
			[4]	Identify the different features of real time and mobile operating systems
			[5]	Install and use available open-source kernel
			[6]	Modify existing open-source kernels in terms of
				functionality or features used.
30	BCSF188ET0	Parallel and Distributed	[1]	To demonstrate the power and purpose of parallelism and To understand different types of parallel
		Algorithms	[0]	architecture, performance of parallel programs
			[2]	To demonstrate concepts of data and task parallelism, independent parallelism, Introduction to
				Java multithreading, Fork-join parallelism. And
				Analyze fork and join parallelism, parallel prefix, parallel pack.
			[3]	To understand the concepts of Mutual exclusion,
				Deadlocks and ParallelComputational Models and
				Simulating CRCW, CREW and EREW, PRAM
			Г <i>А</i> Э	algorithms
			[4]	To demonstrate the concepts of Brent's Theorem, Simple parallel programs in MPIenvironments and
				Simple paranet programs in wir tenvironments and

SRI CHANDRASEKHARENDRA SARASWATHI VISWA MAHAVIDYALAYA

(SCSVMV)

(Deemed to be University u/s 3 of the UGC Act 1956) (Accredited with 'A' Grade by NAAC) Enathur, Kanchipuram - 631 561.

			[5]	construct the task dependency graph for Quick sort algorithm. To demonstrate the general concepts on Distributed systems model, messagepassing and peer-to-peer systems.
31	BCSF188ES0	Soft Computing	[1]	Understand the concepts of fuzzy sets, knowledge representation using fuzzy rules, approximate reasoning
			[2]	Reveal different applications of these models to solve engineering and otherproblems fuzzy inference systems, and fuzzy logic.
			[3]	Understand the fundamental theory and concepts of neural networks, Identifydifferent neural network architectures, algorithms, applications and theirlimitations.
			[4]	Evaluate various techniques of soft computing to defend the best working solutions.
			[5]	Design hybrid system to revise the principles of soft computing in variousapplications

COs (Course Outcomes)

S.No	Course Code	Course Name	Course Outcome	
1		Electronic Devices	 Design circuits with transistor biasing. Design simple amplifier circuits. Analyze the small signal equivalent circuits of transistors and Design and analyze large signal amplifiers. 	
2		Digital System Design	[1] Analyze different methods used for simplification of Boolean expressions.[2] Design and implement Combinational circuits.	

SRI CHANDRASEKHARENDRA SARASWATHI VISWA MAHAVIDYALAYA

		[3]	Design and implement synchronous andasynchronous sequential circuits.
3	Signals and Swatawa	[4]	Execute simple HDL codes for the circuits
3	Signals and Systems	[1]	Understand the properties and representation of continuous and discrete time signals
		[2]	Analyze the discrete time systems using z-transforms
4	Network Theory	[1]	Analyze the behavior of different circuits and their
•	Network Theory	[1]	response using various circuit analysistools and theorems
		[2]	Apply and analyse the circuits in time domain and frequency domain.
		[3]	Understand basic concepts regarding the system definition mathematically and associatenetwork function.
		[4]	Interpret the concept of Network synthesis
5	Analog Electronics	[1]	Determine the configuration and apply the characteristics of diodes and transistors.
		[2]	Design and analyze various Rectifier and Amplifier circuits.
		[3]	Design sinusoidal and non-sinusoidal oscillators
		[4]	Characterize the functioning of OP-AMP and design OP-AMP based circuits
		[5]	Design ADC and DAC circuits.
6	Analog and Digital Communication	[1]	Compare different analog modulation schemes for their efficiency and bandwidth.
		[2]	Analyze the behaviour of communication systems in the presence of noise
		[3]	Investigate pulse modulation systems and analyse their system performance
		[4]	Compute bit error performance of various modulation schemes.
7	Microprocessors and	[1]	Execute programs using assembly language
	Microcontrollers	[2]	Design interfacing peripherals like, I/O, A/D, D/A, timer etc.
		[3]	Develop systems using different microcontrollers
		[4]	Characterize RSIC processors and design ARM microcontroller-based systems.
8	Measurement and	[1]	Use various types of Electrical Instruments
	Instrumentation	[2]	Use various types of Electronic Instruments
9	Electromagnetic	[1]	Determine the characteristics and wave propagation
	Fields and		on HF transmission lines.
	Waveguides	[2]	Apply impedance transformation on Transmission lines.

SRI CHANDRASEKHARENDRA SARASWATHI VISWA MAHAVIDYALAYA

(SCSVMV)

		[3]	Use transmission line sections for realizing circuit elements
		[4]	Characterize uniform plane wave.
		[5]	Calculate reflection and transmission of waves at
			media interface.
		[6]	Analyze wave propagation on metallic waveguide sin modal form.
		[7]	Determine the radiation and radiation characteristics of an antenna.
10	Microwave	[1]	Illustrate the concepts of propagation and analysis in
10	Engineering		RF and Microwave networks
		[2]	Understand various microwave system components and their properties.
		[3]	Analyze / synthesis the microwave systems
		[4]	Appreciate that during measurements of microwave
			systems, the different mathematicaltreatment is required compared to general circuit analysis
		[5]	Design microwave systems for different practical
			application.
11	Computer	[1]	Understand the basics structure of computers and
	Architecture		instructions.
		[2]	Illustrate the fixed point and floating-point arithmetic
			for ALU operation.
		[3]	Discuss about implementation schemes of data-path
			and control units and pipelineperformance.
		[4]	Explain the concept, interfacing and organization of
			of various memories and I/O systems.
		[5]	Discuss parallel processing technique and
			unconventional architectures.
12	Digital Signal	[1]	Apply DFT and FFT algorithms for the analysis of
	Processing		digital signals and systems.
		[2]	Design FIR filters for various applications.
		[3]	Design IIR filters for various applications.
		[4]	Characterize the effects of finite precision
			representation on digital filters.
		[5]	Design multi-rate filters
13	Computer Aided	[1]	Understand the concepts of the simulation
	System Design		components and analysis for electronic devices and components in PSPICE.
		[2]	Develop the analog and digital modelling concepts in
			frequency and time domains inPSPICE.
		[3]	Develop programs for combinational and sequential
		[[-]	logic circuits by identifying the differentiabstraction

SRI CHANDRASEKHARENDRA SARASWATHI VISWA MAHAVIDYALAYA

(SCSVMV)

		[4] [5]	and delay models for digital circuits in VHDL Develop programs for combinational and sequential logic circuits by applying the differentabstraction and delay models for digital circuits in Verilog HDL. Develop programs for combinational and sequential logic circuits at switch level in VerilogHDL and understand Verilog synthesis flow.
14	Control Systems	[1]	Represent a control system and thereby to obtain the mathematical model
		[2]	Perform time domain analysis of control systems.
		[3]	Perform frequency domain analysis of control systems.
		[4]	Design compensators that can be used to design control systems with required specifications
		[5]	Understand the state variable analysis of systems
15	Computer Netwo	orks [1]	Choose the required functionality at each layer for given application
		[2]	Detect and correct the error in the frame
		[3]	Apply the knowledge of addressing scheme and
			various routing protocols in datacommunication to
		E 43	select optimal path.
		[4]	Trace the flow of information from one node to
		[5]	another node in the network
16	Principles of	[1]	Develop real time applications of network Examine situations and to internalize the need for
10	Management & Professional Eth		applying ethics principles, values to tackle withvarious situations.
		[2]	Develop a responsible attitude towards the use of computer as well as the technology.
		[3]	Able to envision the societal impact on the products / projects they develop in their career.
		[4]	Understanding the code of ethics and standards of computer professionals.
		[5]	Analyze professional responsibility and empowering access to information in the work place
17	Embedded Syste	ms [1]	Describe the architecture and programming of ARM processor.
		[2]	Outline the concepts of embedded systems.
		[3]	Use the system design techniques to develop software for embedded systems.
		[4]	Differentiate between the general purpose and real
		r <i>e</i> n	time operating system.
		[5]	Model real-time consumer/industrial applications

SRI CHANDRASEKHARENDRA SARASWATHI VISWA MAHAVIDYALAYA

(SCSVMV)

		using embedded-system concepts
18	Optical Communication	[1] Demonstrate an understanding of optical fiber communication link, structure, propagation andtransmission properties of an optical fiber.
		[2] Estimate the losses and analyze the propagation characteristics of an optical signal in differenttypes of fibers.
		[3] Describe the principles of optical sources and power launching-coupling methods.
		[4] Compare the characteristics of fiber optic receivers.
		[5] Design a fiber optic link based on budgets To assess the different techniques to improve thecapacity of the system.
19		[1]

Programme Name:	Electronics and Instrumentation Engineering

Programme Code: BE

PSOs (Programme Specific Outcome)

Name of the Programme	PSO Statement
BE Electronics and	PSO 1.Graduates apply the knowledge of mathematical and physical
Instrumentation Engineering	science to solve problems in Control Engineering, Process Control,
	Robotics and Automation
	PSO 2.Graduates are capable of handling and applying modern
	engineering tools, software for Industrial Automation
	PSO 3.Graduates are capable of working in teams in industrial
	environment, research laboratory and carrying out major Industrial
	projects

PEOs (Programme Educational Objectives)

Name of the Programme	PEO Statement
Electronics and Instrumentation	[1] : To produce graduates having a strong background of
Engineering	basic science, Mathematics & Engineering and ability to use
	these tools.
	[2] : To produce graduates who can demonstrate technical
	competence in the field of instrumentation engineering and
	develop solutions to the complex problems
	[3] : To produce graduates having professional competence

SRI CHANDRASEKHARENDRA SARASWATHI VISWA MAHAVIDYALAYA

(SCSVMV)

(Deemed to be University u/s 3 of the UGC Act 1956) (Accredited with 'A' Grade by NAAC) Enathur, Kanchipuram - 631 561.

through life-long learning such as advanced degrees, professional
skills and other professional activities related globally to
engineering & society
[4] : To produce graduates who function effectively in a
multi-disciplinary environment and individually, within a
societal and environmental context
[5] : To produce graduates who would be able to take
individual responsibility and work as a part of a team towards the
fulfillment of both individual and organizational goals.

COs (Course Outcomes)

S.No	Course Code	Course Name	Course	e Outcome
1	BEIF183T30	Electronic Devices	[1]	Identify the device for appropriate application.
		and Circuits	[2]	Design amplifier and oscillator circuits using BJT,
				MOSFET.
			[3]	Demonstrate the knowledge to build projects in
				sciplinary environments.
2	BEIF183T40	Signal and Systems	[1]	Understand the properties and representation of
				discrete and continuous signals.
			[2]	Analyze and transform signals to different domains.
			[3]	Perform the analysis and synthesis of discrete time
				systems
			[4]	Perform the finite and infinite impulse response
				analysis of discrete time systems.
3	BEIF183T50	Electrical	[1]	Understand Measurement systems and Bridge
		Measurement		measurements.
			[2]	Understand Know the principles of cathode ray
				oscilloscopes and other measuringinstruments
			[3]	Understand the Compare analog and digital
				techniques and measurement errors
4	BEIF183T60	Sensors and	[1]	Analyse the basics and design the resistive sensors.
		Actuators	[2]	Identify the materials and designing of inductive and
				capacitive sensors.
			[3]	Analyze various types of Actuators
			[4]	Design of micro sensors and micro actuators for

SRI CHANDRASEKHARENDRA SARASWATHI VISWA MAHAVIDYALAYA

(SCSVMV)

				various applications.
			[5]	Implementfabrication process and technologies and
			[-]	compare various micro machining processes
5	BEIF183T20	Object Oriented Programming	[1]	Specify simple abstract data types and design implement at ions, using abstractionfunctions to document them.
			[2]	
			[2]	Recognize features of object -oriented design such as encapsulation, polymorphism, inheritance, and composition of systems based on object identity.
			[3]	Name and apply some common object-
			L- 1	oriented design patterns and give examples of
				their use.
			[4]	Develop applications using OOPs Concept.
6	BEIF184T10	Digital Signal	[1]	Understand discrete transform and its application.
-		Processing	[2]	Design of infinite and finite impulse response filters for various applications.
			[3]	Apply signal processing concepts in systems having more than one sampling frequency
7	BEIF184T20	Industrial	[1]	Understand the various techniques used for the
		Instrumentation		measurement of industrial parameters.
			[2]	Explain the design and working of various
				instruments
			[3]	Understand the installation techniques of various systems
			[4]	Understand the concept of various transducers used in industries
			[5]	Work with signal conditioning circuit of various measuring equipments
8	BEIF184T30	Principles of	[1]	Understand the need for modulation and amplitude
		Communication		modulation techniques
			[2]	Understand frequency modulation, demodulation and
				the comparison of AM and FM
			[3]	Understand the PAM, PPM and PWM techniques
			[4]	Understand the different methods of PCM, PAM,
			L . 1	DPCM, DM, ADM schemes which are used in
				digital communication.
9	BEIF184T50	Linear Integrated	[1]	Enumerate and analyze different steps involved in he
		Circuits	L-1	fabrication process of integrated circuit
			[2]	Understand the concept of linear applications using
			L-J	Op-Amp and regulator

SRI CHANDRASEKHARENDRA SARASWATHI VISWA MAHAVIDYALAYA

(SCSVMV)

			[3]	Ability to test and analyze the various applications of PLL and Timers.
			[4]	Understand the concept of Special Function Integrated Circuits
			[5]	Understand the concept of Application Integrated
				Circuits.
10	BEIF184T60	Digital Electronics	[1]	Understand the basic number system and Boolean algebra
			[2]	Understand the basics of combinational and
			[2]	sequential circuits
			[3]	Know about Flip Flops and their designing
			[4]	Analyze about State reduction techniques and various hazards present in the circuit
			[5]	Understanding the concepts of VHDL programming
				for designing Digital Circuits
11	BEIF185T10	Control Systems	[1]	Understand the basics of control system for the design and analysis
			[2]	Understand the issues related to time response
			[2]	analysis
			[3]	Perform frequency response and stability analysis.
			[4]	Design compensators in time and frequency domain.
			[5]	Understand the concept of stability and its
			[5]	assessment for linear time invariant systems.
12	BEIF185T20	Process Control	[1]	Understand basic principles and importance of
12	DEI 103120	Instrumentation	[1]	process control in industrial process plant
			[2]	Acquire knowledge basic control action and its
				form
			[3]	Specify the required instrumentation and final
				control elements to ensure well-tuned control
			[4]	Apply the control system in various complex
				processes
			[5]	Gain the knowledge of Piping and
				Instrumentation Diagram.
13	BEIF185T30	Power Electronics and Industrial Drives	[1]	Choose the Power Devices based on the Application.
			[2]	Selection and Design of AC to DC, AC to AC
			[2]	Controlled Converters
			[3]	Design Choppers and Inverters.
			[4]	Implement the types of drives for different application.
				application.

SRI CHANDRASEKHARENDRA SARASWATHI VISWA MAHAVIDYALAYA

(SCSVMV)

			[5]	Apply above conceptual things to real world problems in a Power System drives.
14	BEIF185T40	Power Plant Instrumentation	[1]	Understand the basic principles of powergeneration.
			[2]	Understand about measurement of various parameters in powerplant.
			[3] [4]	Know the various analyzers in powerplant. Understand about the turbine boilercontrol.
			[5]	Understand about the turbine bonercontrol.
15	BEIF186T10	PLC and Data	[1]	Able to understand the need of computer in
		Acquisition System	[0]	Automation.
			[2]	Understand the basics of data conversion and data acquisition.
			[3]	Understand the fundamental of PLC.
			[4]	Program a PLC with different logical languages.
			[5]	Various industrial applications of PLCs are studied.
16	BEIF186T20	Microprocessor and	[1]	Understand the block diagram, architecture and
		Microcontroller		interrupts of 8085 microprocessor
			[2]	Understand the 16-bit microprocessor architecture
			[2]	and modes of operation
			[3]	Acquire knowledge about the co-processor configuration also the architecture of the co-
				processors 8087 and 8089
			[4]	Understand the ICs 8255 PPI, 8259 PIC, 8257 DMA,
				8251 USART, 8279 Keyboard display controller interfacing
			[5]	Understand the architecture of microcontroller and
				SFR operations, interfacing with peripherals.
17	BEIF186T30	Principles of	[1]	Helps to examine situations and to internalize the
		Management and Professional Ethics		need for applying ethics principles, values to tackle
		FIOLESSIONAL EULICS	[2]	with various situations
			[4]	Develop a responsible attitude towards the use of computer as well as technology
			[3]	Able to envision the societal impact on the
			L- J	products/projects they develop in their career.
			[4]	Understanding the code of ethics and standards of
				computer professionals
			[5]	Analyze the professional responsibility and
10			F 4 7	empowering access to information in the work place
18	BEIF186T40	Industrial Chemical	[1]	Understand the basic manufacturing various
		Process	[2]	chemicals Get adequate knowledge about the Mass
			[2]	Get adequate knowledge about the Mass transfer/Distillation/Extraction/Leaching process
			[3]	Understand characteristics of chemical reactors.
		1	[-]	encersante enaracteristics of encinear reactors.

SRI CHANDRASEKHARENDRA SARASWATHI VISWA MAHAVIDYALAYA

(SCSVMV)

			[4]	Understand about case study of process variables and
			[]	control in unit operation.
			[5]	Understand about various Automation techniques.
19	BEIF1867T10	Robotics and	[1]	Able to demonstrate the mechanical structures of
		Automation		industrial robots.
			[2]	Able to understand the importance of robot
				vision.
			[3]	Able to apply knowledge and choose the best
				end effectors for specific applications.
			[4]	Forward and inverse kinematics of Robotics is
				learned.
			[5]	Able to program and industrial robot through
				different methods and languages.
20	BEIF185EA0	Analytical	[1]	Understand various techniques and methods of
		Instrumentation		Spectral analysis.
			[2]	Apply the knowledge of chromatography to separate
			503	the constituents from a complex mixture.
			[3]	Get adequate knowledge about Gas sensor and
			[4]	pollution monitoring instruments. Able to select an appropriate analyzer for an
			[4]	Industrial requirement.
				Able to understand the working principle of NMR
				and Mass spectroscopy.
21		Instrumentation and	[1]	Know the role of Instrumentation Engineer in such
		Control in Iron and		iron and steel industries.
		Steel Industries	[2]	Understand the basis of casting technology.
			[3]	Understand the sensors and transducers for various measurements.
			[4]	Know the role of furnace control.
			[5]	Understand the specification of computer application
			1~1	in iron and steel industries.
22		Digital	[1]	Understands various types of digital instruments.
		Instrumentation	[2]	Capableof understanding various digital
				measurement techniques used in the industrial
			[2]	processes.
			[3]	Understands the use of various electrical/electronic instruments, their
				construction, applications, and principles of
				operation.
			[4]	Understands the concepts of the standards and
				units of measurements.
			[5]	Develops basic skills in the design of electronic

SRI CHANDRASEKHARENDRA SARASWATHI VISWA MAHAVIDYALAYA

(SCSVMV)

				Equipment
23		Digital Image Processing	[1]	Know and understand the fundamentals of digital image processing, such as digitization, sampling, quantization, and 2D-transforms.
			[2]	Operate on images using the techniques of smoothing, sharpening and enhancement.
			[3]	Understand the restoration concepts and filtering techniques.
			[4]	Learn the basics of segmentation, segmentation algorithm and features extraction.
			[5]	Ability to understand the compression and recognition methods.
24	BEIF186EE0	Virtual Instrumentation	[1]	Able to understand the difference between
		mstrumentation	[2]	graphical and Textual Programming. Ability to design the loops and to do simple
			[2]	modular Programs.
			[3]	Able to understand the operation of Arrays and
				Clusters.
			[4]	Able to Plot the data in graphs and charts.
			[5]	Ability to interface external hardware with
25		A december of Compared	F11	graphical platform.
25	BEIF186EF0	Advanced Control Systems	[1]	Design compensators using classical techniques.
		b j storils	[2] [3]	Determine the solution to the state equation. Design of Controller using state feedback.
			[3]	Analyze the characteristics and types of
			[,]	nonlinearities
			[5]	Analyze the stability of Non-Linear System`
26	BEIF186EG0	Instrumentation and	[1]	Understand the concept in instrumentation of
		Control in Paper and	[0]	paper industry.
		Pulp Industries	[2]	Understand the basic concepts of measurements used in paper industry.
			[3]	
			[9]	industries.
			[4]	Know in detail about the density controls used in
				paper industries
			[5]	Know to apply all the special application in paper industry.
27	BEIF186EH0	Energy Management	[1]	Have adequate knowledge about different type
		and Industrial safety	101	of fuels for energy production methods.
			[2]	Acquire knowledge on properties of combustion

SRI CHANDRASEKHARENDRA SARASWATHI VISWA MAHAVIDYALAYA

(SCSVMV)

				on different fuels
			[3]	Know the basic concepts of energy
			[4]	management. Acquire knowledge on the applications of
			[+]	Hazards
			[5]	Understand the Practical Issues and
				Implementation of industrial safety.
28	BEIF187EI0	Embedded Systems	[1]	Understand the various applications, challenges
				involved in Embedded system design
			[2]	Recognize the suitable processor, understanding
				the memory operations of the embedded system.
			[3]	Understand the communication types in the
				embedded systems and complete understanding
				about the communication protocols.
			[4]	Understand various functions, services of RTOS
				and different scheduling models to design an
				embedded system.
			[5]	Implement the concepts of programming &
				optimization techniques. Case studies to analyze
				the complete development of the embedded
				system.
29	BEIF187EJ0	Neural Network and	[1]	Analyze the basic knowledge of neural networks.
		Fuzzy Logic Control	[2]	Analysis of learning systems in conjunction with
			[3]	feedback control systems Analyze the basics of Fuzzy Logics.
			[4]	Acquire knowledge on the applications of
			r.1	Computer simulation of intelligent controlsystems.
			[5]	Learn the usage of different types of algorithms.
30	BEIF187EK0	Instrumentation for	[1]	Able to understand the necessity of
		Agriculture and		instrumentation in agriculture and food
		Food Processing Industries		processing.
		Industries	[2]	Familiarized with instrumentation requirement
				in agriculture and food processing.
			[3]	Able to analyze and design systems/instruments
				for agriculture and foodprocessing.
			[4]	Able to understand on agriculture used in the
				measurement and control.
			[5]	Able to understand problems in agriculture and
				food processing and provide technological

SRI CHANDRASEKHARENDRA SARASWATHI VISWA MAHAVIDYALAYA

(SCSVMV)

				solution to the same.
31	BEIF187EL0	Optimal Control System	[1]	Ability to understand the optimal control problem formulation and its selection of
			[2]	performance measures.
			[2]	Ability to recognize and recall the fundamentals of calculus of variation.
			[3]	Ability to implement optimal control concept for
			[9]	minimum time problem and ability to apply
				Matrix Ricatti Equation for real problem
			[4]	Ability to understand various iterative numerical
				technique and gradient projection algorithm.
			[5]	Ability to understand the concepts of dynamic programming.
32	BEIF187EM0	Computer Control of	[1]	Able to understand the analysis of discrete data
		Process		system
			[2]	Able to Design various digital
				controlalgorithms.
			[3]	Able to learn the techniques of DAS, DDC, AI and SCADA.
			[4]	Ability to build models from Input-Output data.
			[5]	Ability to design Multi-loop and multivariable
				controller for multivariable system.
33	BEIF187EN0	Process Equipment	[1]	Able to interpret and formulate design
		Design		specifications for instrumentation systems
			[2]	Able to understand the principle design of sensors like RTD and Thermistor
			[3]	Able to understand the principles design of
				sensors for Flow and Level
			[4]	Able to design a signal conditioning circuit for
				various process measuring sensors
			[5]	Able to design a final control element for a
34	BEIF187EO0	Mechatronics	<u>г</u> 11	control loop. Model and analyze electrical and mechanical
5-	DEII 10/EOU	witchautonics	[1]	systems and their interconnection.
			[2]	Able to use the drive systems.
			[2]	Be proficient in the use of fluid power systems
			[~]	in various Mechatronics applications.
			[4]	Demonstrate the use of industrial electronic

SRI CHANDRASEKHARENDRA SARASWATHI VISWA MAHAVIDYALAYA

(SCSVMV)

				devices.
			[5]	Demonstrate the design of modern CNC
				machines, and Mechatronics elements
35	BEIF187EP0	Non-Linear Control	[1]	Understand the basics of nonlinear systems.
		Systems	[2]	Understand the analytics behind nonlinear
				systems.
			[3]	Derive the Linearization methods and
			[4]	approximation methods Understand the stability analysis of nonlinear
			[+]	systems
			[5]	Understand the concepts of IO stability and its
				relationship.
36	BEIF187EQ0	Aircraft	[1]	Develop basic knowledge in the behavior and
		Instrumentation		characteristics of various display devices in aircraft.
			[2]	Acquire knowledge on various pressure measuring instruments.
			[3]	Acquire knowledge on gyroscopic instruments
			[-]	and Magnetic instruments.
			[4]	Acquire knowledge on Flight instruments and
				Waring systems
			[5]	Acquire knowledge on Fuel Systems,
				maintenance and servicing.
37	BEIF187ER0	Engineering Economics	[1]	Acquire the skills to apply the basics of
		Leonomies	[2]	economics. Understand techniques and methods of
			[2]	sensitivity and expected-value decisions.
			[3]	Acquire the skills for cost analysis to
				engineering.
			[4]	Demonstrate knowledge of cost estimation
			[5]	techniques and probabilistic risk analysis. Acquire the skills to take economically sound
			[2]	decisions.
38	BEIF187ES0	Fiber Optics and	[1]	Specify and operate optical test instrumentation,
		Laser Instrumentation	507	optical fibers, optical sources and detectors.
		msuumentation	[2]	Know about the Industrial applications of optical fibers.
			[3]	Ability to understand the fundamentals of Laser.
			[4]	Know about the Industrial applications of Laser.

SRI CHANDRASEKHARENDRA SARASWATHI VISWA MAHAVIDYALAYA

(SCSVMV)

			[5]	Understand the concept of Holography and laser work area, citing unsafe conditions present.
39	BEIF187ET0	Digital Control Systems	[1] [2] [3]	Analyze digital systems in time domain. Analyze digital systems in frequency domain. Model and analysis digital systems in state space representation.
			[4] [5]	Design state observer and state feedback by pole placement design Understand the concept of stability in discrete domain.
40	BEIF188EU0	Automotive Instrumentation	[1]	Understand depth knowledge on automobile system, its subsystems and components.
			[2]	Know about the concepts of various sensors used in automobile systems.
			[3]	Know the basic and advanced controls in automotive systems.
			[4] [5]	Understand about safety system clearly. Understand depth knowledge about the electronics and software involved in automotive
41	BEIF188EV0	VLSI Design	[1]	systems. Analyze the basics of VLSI Technology and MOS Theory
			[2]	Understand the principles and design Rules of CMOS-VLSI technology.
			[3]	Analyze the performance of MOS and CMOS Circuits Logics.
			[4]	Analyze design issues involved at circuit logic and system level.
			[5]	Adequate knowledge about programmable logics.
42	BEIF188EW0	Autotronics	[1]	Develop through basic knowledge about various ignition and injection systems
			[2]	Acquire knowledge on the safety systems of the automobiles
			[3]	Learn about various methods of sensors for engine controls
43	BEIF188EX0	Real Time Embedded System Design	[1]	Understand the national and international job market, both in the industry as high – skilled expert and in the academia as a researcher or prospective PhD student.
			[2]	Acquire knowledge and understand fundamental

SRI CHANDRASEKHARENDRA SARASWATHI VISWA MAHAVIDYALAYA

(SCSVMV)

			[3] [4] [5]	embedded systems design paradigms, architectures, possibilities and challenges, both with respect to software and hardware. Categorize the interrupts and program the interrupt controllers Understand the operation, services, and functions of Real time operating systems. Practically apply gained theoretical knowledge in order to design, analyze and implement
44	BEIF188EY0	Biomedical Instrumentation	[1] [2] [3] [4]	embedded systems. Know the basic concepts of Anatomy & Physiology. Have adequate knowledge about different types of Electrodes, Transducers and Amplifiers. Understand the important and modern methods of imaging techniques. Comprehend about the Human Assist Devices and Therapeutic Equipments
45	BEIF188EZ0	Machine Vision	[1] [2] [3]	Develop through basic knowledge about Machine Vision. Acquire knowledge on the applications of image processing and analysis. Learn the usage of image processing and analysis.
46	BEIF188EA1	MEMS	[1] [2] [3] [4] [5]	Analyze the basics and scaling laws of micro fabrication methods. Identify the materials for MEMS sensors and designing of sensors. Design Micro actuators for various applications. Implement Micro system fabrication process and technologies. Analyze packaging methods and compare various Micro machining processes
47	BEIF188EB1	Wireless Communication	[1] [2] [3] [4]	Understands the fundamentals of wireless channels with path loss. Capable of understanding of multiple access techniques. Acquired the knowledge of digital signaling of fading channels. Acquired the idea of multipath mitigation techniques.

SRI CHANDRASEKHARENDRA SARASWATHI VISWA MAHAVIDYALAYA

(SCSVMV)

			[5]	Understands multiple input multiple output antenna techniques
48		Green and Smart Buildings	[1]	Define a green building, along with its features, benefits and rating systems.
		Dunungs	[2]	Describe the criteria used for site selection and
			[4]	water efficiency methods.
			[3]	Explain the energy efficiency terms and methods used in green building practices.
			[4]	Select materials for sustainable built
			[']	environment & adopt waste management methods.
			[5]	Describe the methods used to maintain indoor
				environmental quality.
49		Operation Research	[1]	Have the knowledge of the Mathematical formulation of the problem which is a tool in the development of theoretical of engineering science.
			[2]	Understand the model of Transportation and assignment design in engineers.
			[3]	Have the knowledge of Game theory and
			[-]	sequencing problems in engineering.
			[4]	Understand about Solution of integer
				programming and design of Inventory control in engineers.
			[5]	Have a knowledge of solving problems in
				Resource allocation Scheduling
50	BEIF1850EA	Electric Hybrid	[1]	Know and understand the fundamentals of
		Vehicle Technology		electric vehicles.
			[2]	Understand the concept of Battery.
			[3]	Understand the DC and AC electrical machines
			[4]	Learn the concept of electric vehicles
			[5]	Ability to understand the hybrid electric vehicles.
51		Material Engineering	[1]	Identify crystal structures for various materials
				and understand the defects in such structures.
			[2]	1 1
				ferrous and non-ferrous alloys and how to
				quantify mechanical integrity and failure in
			[2]	materials
			[3]	Understand the micro structural aspects and phases of Fe-C systems.
				phases of re-c systems.

SRI CHANDRASEKHARENDRA SARASWATHI VISWA MAHAVIDYALAYA

(SCSVMV)

			[4] [5]	Understand the various heat treatment process. Properties and applications of ferrous and non- ferrous metals.
52	BEIF186OEE	Radar and Navigation	[1]	Understand the principles of navigation, radar equation and antenna parameters.
			[2] [3]	Know about the concept of tracking system. Understand about the signal approach and
			[4]	landing aids as related to navigation. Derive and discuss the Range equation and the nature of detection.
			[5]	Describe about the navigation systems using the satellite.
53	BEIF186OEF	Human Resource	[1]	Understands the perspectives of Human
		Management	[0]	resources management
			[2]	Best fit employee concept provided with demand and requirement.
			[3]	Acquired the knowledge of training and
			L- J	executive development
			[4]	Explained the concept of sustaining the
				employee with compensation plans
			[5]	Acquired the method of performance evaluation and control process
54	BEIF186OEG	Waste Water	[1]	An ability to estimate sewage generation and
-		Engineering	[-]	design sewer system including sewage pumping stations.
			[2]	An ability to perform basic design of the unit
				operations and processes that are used in sewage
			[2]	treatment.
			[3]	Understand the characteristics and composition of sewage.
			[4]	Understand the standard methods for disposal of
				sewage and self-purification of streams.
			[5]	Gain knowledge on sludge treatment and
55	BEIF186OEH	Computer Aided	[1]	disposal. Understand the basics of CAD/CAM.
55		Design	[1]	Exposure over the concepts of computer
			[_]	graphics.
			[3]	Learn about the geometric issues concerned to
			F 47	the manufacturing and its related areas.
			[4]	Understand the latest advances in the
L				manufacturing perspectives.

SRI CHANDRASEKHARENDRA SARASWATHI VISWA MAHAVIDYALAYA

(SCSVMV)

			[5]	Provide an overview of how computers are being used in design, development of manufacturing plants.
56	BEIF187OEI	Data Communication and Network	[1]	Know and understand the fundamentals of the functions of the different layer of OSI Protocol.
		Systems	[2]	Ability to understand about wide-area networks (WANs), local area networks (LANs).
			[3]	Ability to design wide-area networks (WANs), local area networks (LANs) for thegiven requirement.
			[4]	For a given problem related TCP/IP protocol developed the network programming.
			[5]	Configure the Application Layer, software and tools
57	BEIF187OEJ	Energy Harvesting Technologies	[1]	Select proper Piezo electric materials for its applications.
			[2]	Identify and design the solar energy applications.
			[3]	Design wind turbines for various applications.
			[4]	Implement Tidal and Ocean wave harvesting
			r 7 1	methods and technologies.
			[5]	Analyze the basics and scaling laws of micro fabrication methods.
58	BEIF187OEK	Disaster Management	[1]	Distinguish the forms of disasters and their impact on the environment and society
			[2]	Assess the vulnerability and different
			[2]	approaches of risk reduction measures
			[3]	Understand the hazard and vulnerability profile of India
			[4]	Analyse the circumstances in the Indian context,
				for Disaster damage assessment and
			[5]	management Be an active, responsible citizen during the
			[9]	disasters and help to create safe society
59	BEIF187OEL	Battery Technology	[1]	Recognize the basic physical concepts and
			[2]	kinetics involved in electrochemical reactions
			[2]	Select the appropriate battery system with respect to application
			[3]	Analyze the characterization methods of
				batteries and interpret concepts describing
				battery performance

SRI CHANDRASEKHARENDRA SARASWATHI VISWA MAHAVIDYALAYA

(SCSVMV)

			[4]	Describe the recent developments battery
				systems
			[5]	Understand the battery systems for automotive
				and discuss the Life Cycle Analysis according to cost and environmental aspects and energy
				consumption, reuse, recycling.
60	BEIF188OEL	Data Compression	[1]	Program, analyze Hoffman coding: Loss less
		Techniques		image compression, Text compression, Audio Compression.
			[2]	Program and analyze various Image
			[~]	compression and dictionary-based techniques
				like static Dictionary, Diagram Coding,
				Adaptive Dictionary.
			[3]	Understand the statistical basis and performance
				metrics for lossless compression. Understand the
				conceptual basis for commonly used lossless
				compression techniques,
			[4]	and understand how to use and evaluate several
				readily available implementations of those
			5.77	techniques.
			[5]	Understand the structural basis for and
				performance metrics for commonly used lossy
				compression techniques and conceptual basis for
61	BEIF1880EM	Satellite	[1]	commonly used lossy compression techniques. Visualize the architecture of satellite systems as
01	DEII 1000EM	Communication	[1]	a means of high speed, high range
				Communication system and to know about the
				orbital equations.
			[2]	State various aspects related to satellite sub-
				systems.
			[3]	Ability to understand the various phenomena in
				satellite communication.
			[4]	Ability to design link budget for the given
				parameters and conditions.
			[5]	Know about the modulation and multiple access
()	DEIE1000EN		F 4 7	schemes.
62	BEIF1880EN	Entrepreneurship Development	[1]	Have the ability to discern distinct
		Development	[0]	entrepreneurial traits Know the parameters to assess opportunities and
			[2]	constraints for new business ideas
			[3]	Understand the systematic process to select and
			[2]	charistand the systematic process to select and

SRI CHANDRASEKHARENDRA SARASWATHI VISWA MAHAVIDYALAYA

(SCSVMV)

(Deemed to be University u/s 3 of the UGC Act 1956) (Accredited with 'A' Grade by NAAC) Enathur, Kanchipuram - 631 561.

				screen a business idea
			[4]	Design new strategies for successful
				implementation family business.
			[5]	Write a business plan and understand social
				entrepreneurship skills.
63	BEIF188OEO	IoT in Automation	[1]	Understand the concepts of Internet of Things.
			[2]	Analyze basic protocols in wireless sensor
				network.
			[3]	Design IoT applications in different domain
				andbe able to analyze their performance
			[4]	Implement basic IoT applications on embedded
				platform.

PEO. 2: Possess successful technical or professional careers		
PEO. 3: Continue to learn and to adapt to the day to day evolving		
technology in the world		
PEO. 4: Encouraged to design industrial automation systems that are		
innovative and socially acceptable.		

COs (Course Outcomes)

S.No	Course Code	Course Name	Course	e Outcome
1	CHSEN18T10	English	[1]	Understand the nuances of grammar and vocabulary in speaking and writing.
			[2]	Listen and comprehend different spoken excerpts critically, infer and implied meanings.
			[3]	Speak convincingly, express their opinions clearly, initiate a discussion, negotiate, argue using appropriate communicative strategies.
			[4]	Read different genres of texts, infer implied meanings and critically analyse and evaluate them for ideas as well as for method of presentation.
			[5]	—
2	CBSMA18T20	Mathematics I	[1]	The concept of convergence and divergence and their testing that is fundamental to application of analysis to Engineering problems.
			[2]	The effective mathematical tools for the solutions of differential equations that model physical processes.
			[3]	To apply differential and integral calculus to notions of curvature and to improper integrals. Apart from some other applications they will have a basic understanding of Beta and Gamma functions.

SRI CHANDRASEKHARENDRA SARASWATHI VISWA MAHAVIDYALAYA

(SCSVMV)

			F 4 7	
			[4]	The mathematical tools needed in evaluating multiple integrals and their usage. To deal with functions of several variables that are essential in most branches of engineering.
			[5]	To improve the ability of numerical computations to find the solutions of a given polynomial and transcendental equations along knowing the process
				of inter and extrapolations that improves the ability of solving helps to performcomputational engineering problems
3	CBSPH18T30	Engineering Physics	[1]	To develop an understanding of the principles of optics.
			[2]	Experience the diverse applications of the wave equation. Learn the mathematical tools needed to solve quantum mechanics problems.
			[3]	To provide adequate knowledge on laser fundamentals types and applications and to expose the basics of signal propagation through fiber optics
			[4]	Understand the principles and concepts of semiconductor Physics. Understand and utilize the mathematical models of semiconductor junctions
				and MOS transistors for circuits and systems.
			[5]	Acquire basic knowledge on various newly developed smart materials
4	CESCS18T40	Programming for Problem Solving	[1]	To formulate simple algorithms for arithmetic and logical problems.
			[2]	To translate the algorithms to programs (in C language).
			[3]	To test and execute the programs and correct syntax and logical errors.
			[4]	To implement conditional branching, iteration and recursion.
			[5]	To use arrays, pointers and structures to formulate algorithms and programs.
			[6]	To decompose a problem into functions and synthesize a complete program using divide and conquer approach.
			[7]	To apply programming to solve matrix addition and multiplication problems and searching and sorting problems.

SRI CHANDRASEKHARENDRA SARASWATHI VISWA MAHAVIDYALAYA

(SCSVMV)

			[8]	To apply programming to solve simple numerical method problems.
5	CBSCH18T20	Engineering Chemistry	[1]	Realize the importance of knowledge in atomic structure and wave mechanics in studying the properties of elements
			[2]	Analyze and deduce the properties molecules on the basis of different bonding modes
			[3]	Rationalizebulk properties and processes usingthermodynamic considerations
			[4]	Distinguish the ranges of the electromagnetic spectrum used for exciting different molecular energy levels in various spectroscopic techniques
			[5]	Understand the major types of chemical reactions and effect of three-dimensional structures on the product of reactions
6	CBSMAF8T10	Mathematics – II	[1]	Determine consistency of liner system of equations, Rank, Eigen values and eigen vectors of the given square matrix also compute power, inverse of the
			[2]	matrix using cayley Hamilton theorem. Work numerically on the ordinary differential equations and partial differential equations using different methods through the theory of finitedifferences
			[3]	Apply Laplace transform and its inverse to solve initial value and other related problems.
			[4]	Use Fourier transforms and its inverse in practical applications of electronics engineering.
			[5]	Solving finite difference equation in z-transforms
7	CESEE18T30	Basic Electrical	[1]	Explain the basic electrical quantities and laws.
		Engineering	[2]	Explain the construction, types and applications of electrical machines.
			[3]	Study the working principles of power converters.
			[4]	Show the tariff for a given load and energyconsumption.
			[5]	Introduce the components of low voltage electrical installations and its applications.
8	CMCCH28T50	Environmental Sciences and	[1]	Understand the individual responsibility towards environment
		Engineering	[2]	Create Eco-centrism approach towards sustainable society

			of India
		[4]	Analyse the circumstances in the Indian context, for Disaster damage assessment and management
		[5]	Be an active, responsible citizen during the
 BMTF187OEL	Data	[1]	disasters and help to create safe society Know and understand the fundamentals of the
	Communication and		functions of the different layer of OSI Protocol.
	Network Systems	[2]	Ability to understand about wide-area networks (WANs), local area networks (LANs).
		[3]	Ability to design wide-area networks (WANs), local area networks (LANs) for thegiven requirement.
		[4]	-
		[5]	Configure the Application Layer, software and tools
BMTF188EU0	Machine Vision	[1]	To explain the fundamentals of machine vision systems and its techniques.
		[2]	To summarize the fundamentals of image acquisition systems.
		[3]	To explain the techniques involved in image processing.
		[4]	To summarize the basic techniques in image analysis.
		[5]	To summarize the different machine vision applications and its recent developments.
BMTF188EV0	Autotronics	[1]	Understand the evolution of automotive electronics and charging system
		[2]	Develop through basic knowledge about various
		[3]	ignition and injection systems. Analyse required sensors and actuators for an automotive application.
		[4]	Understand the automotive electronics for engine management system
		[5]	Acquire knowledge on the safety systems of the automobile.
BMTF188EW0	Design of Mechatronics	[1]	Acquire knowledge of Mechatronics system design and simulation, advanced approaches and safety.
	Systems	[2]	Understand of various types of drives, basic system modeling and control.

SRI CHANDRASEKHARENDRA SARASWATHI VISWA MAHAVIDYALAYA

(SCSVMV)

			[3]	
			[4]	Explain the case studies on Data Acquisition and control.
			[5]	Explain various case studies on Mechatronics system
	BMTF188EX0	Flexible	[1]	•
	DWITTTOOLXO	Manufacturing	[1]	manufacturing systems
		Systems	[2]	Explain the use of software and computer control in flexible manufacturing systems
			[3]	Recognize the importance of simulation and
				database systems
			[4]	Explain the group technology and understand the justification of implementing flexible manufacturing systems
			[5]	Recognize the effectiveness of imparting flexible manufacturing systems in various industrial sectors
	BMTF188EY0	Micro Electro	[1]	
		Mechanical Systems	[-]	fabrication methods.
		MEMS	[2]	Identify the materials for MEMS sensors and designing of sensors.
			[3]	Design Micro actuators for various applications.
			[4]	Implement Micro system fabrication process and technologies.
			[5]	Analyze packaging methods and compare various Micro machining processes
	BMTF188EZ0	VLSI Design	[1]	Analyze the basics of VLSI Technology and MOS Theory
			[2]	-
			[-]	CMOS-VLSI technology.
			[3]	Analyze the performance of MOS and CMOS Circuits Logics.
			[4]	Analyze design issues involved at circuit logic and system level.
			[5]	Adequate knowledge about programmable logics
	BMTF188EEA1	IoT in Automation	[1]	Understand the concepts of Internet of Things.
			[2]	Analyze basic protocols in wireless sensor network.
			[3]	Design IoT applications in different domain andbe able to analyze their performance
			[4]	Implement basic IoT applications on embedded
L	L	1	r.1	r

SRI CHANDRASEKHARENDRA SARASWATHI VISWA MAHAVIDYALAYA

(SCSVMV)

			platform.
		[5]	Developing applications of IoT in Industrial
			and Real-World using Python.
BMTF188EEB1	Digital Control	[1]	Analyze digital systems in time domain.
	Systems	[2]	
		[3]	Model and analysis digital systems in state
			space representation.
		[4]	Design state observer and state feedback by
			pole placement design
		[5]	Understand the concept of stability in discrete
			domain.
BMTF1880EM	Nano Technology	[1]	Acquire knowledge on Challenges in the field of
			Nano Electronics.
		[2]	Acquire knowledge on nano electronics &
		503	computer architectures.
		[3]	
		F 43	structures.
		[4]	
		[5]	Acquire knowledge on implementation of memory
 DMTE1000EN	Die Dete Analatien	F11	& sensors in nano electronics.
BMTF1880EN	Big Data Analytics	[1]	Strong Foundations on Data Analytics Models and structure
		[2]	Understanding the Role of Big Data and its
			importance
		[3]	Data modelling and Link stream Analysis
		[4]	Able to setup Analytical Environment using R-Studio
		[5]	Able to perform simple analysis application and
			programs using R –Scripts.
BMTF188OEO	Satellite Communication	[1]	Know and understand the fundamentals of the functions of the different layer of OSI Protocol.
		[2]	
			(WANs), local area networks (LANs).
		[3]	
		[-]	local area networks (LANs) for the given
			requirement.
		[4]	For a given problem related TCP/IP protocol
			developed the network programming.
		[5]	Configure the Application Layer, software and
			tools.

COs (Course Outcomes)

S.No	Course Code	Course Name	Course	e Outcome
1	BMEF183T30	Fluid Mechanics and	[1]	To understand the properties of fluids and concept of
		Machinery		control volume.
			[2]	To understand the applications of the conservation
			503	laws to flow through pipes.
			[3]	To understand the importance of dimensional analysis
			[4]	To understand the importance of various types of flow in pumps.
			[5]	To understand the importance of various types of flow in turbines.
2	BMEF183T40	Thermodynamics	[1]	Apply the first law of thermodynamics for simple open and closed systems under steadyand unsteady
				conditions.
			[2]	Apply second law of thermodynamics to open and
				closed systems and calculate entropyand availability.
			[3]	Apply Rankine cycle to steam power plant and
				compare few cycle improvementmethods
			[4]	Derive simple thermodynamic relations of ideal and
			[6]	real gases
			[5]	Calculate the properties of gas mixtures and moist air and its use in psychometricprocesses
3	BMEF183T50	Material Engineering	[1]	Student will be able to identify crystal structures for
5			[1]	various materials and understand thedefects in such structures.
			[2]	Understand how to tailor material properties of
				ferrous and non-ferrous alloys. How toquantify
				mechanical integrity and failure in materials
4		Basic Electronics	[1]	Understand the principles of semiconductor devices
		Engineering		and their applications.
			[2]	Design an application using Operational amplifier.
			[3]	Understand the working of timing circuits and oscillators.
			[4]	Understand logic gates, flip flop as a building block of digital systems.
			[5]	Learn the basics of electronic communication system
5		Applied	[1]	Upon completion of this course, the students will be
		Thermodynamics		able to analyse the problems of nozzles & turbines.

SRI CHANDRASEKHARENDRA SARASWATHI VISWA MAHAVIDYALAYA

(SCSVMV)

(Deemed to be University u/s 3 of the UGC Act 1956) (Accredited with 'A' Grade by NAAC) Enathur, Kanchipuram - 631 561.

		[2]	Explain the functioning & features of I.C. Engines &
			Calculate the performance of I.C.Engines.
		[3]	Analyse & solve the problems of air standard cycles
		[4]	Analyse the performance behavior of single & multi
			stage reciprocating air compressors.
		[5]	Understand the different Refrigeration & A/C systems and solve the problems of VCRsystem
6	Strength of Materials	[1]	Recognize various types loads applied on machine components of simple and compositebars.
		[2]	Recognize the stresses developed on various types of beams.
		[3]	Recognize the slope and deflection developed on various types of beams.
		[4]	Evaluate the strains and deformation that will result due to the elastic stresses developed within the materials for simple types of loading.
		[5]	Understand the nature of internal stresses.
7	Kinematics of	[1]	Understand the basics of mechanism
	Machines	[2]	Calculate velocity and acceleration in simple
		[-]	mechanisms
		[3]	Develop CAM profiles
		[4]	Solve problems on gears and gear trains
		[5]	Examine friction in machine elements
8	Manufacturing Processes	[1]	Apply the concepts of different metal casting processes, associated defects
		[2]	Gain the knowledge in various sheet metal making processes.
		[3]	Understand the mechanism of material removal
		[~]	processes
		[4]	Compare the different metal joining processes
		[5]	Understand the different unconventional
		[~]	Manufacturing Methods employed for
			makingdifferent products.
