National Space Day Quiz Event

Report

Introduction:

On August 23, 2024, students under S.E.T.S Club and Mechatronics Engineering of EIE department, Sri Chandrasekharendra Saraswathi Viswa Mahavidyalaya (SCSVMV) celebrated India's maiden National Space Day (NSpD-2024). This day holds special significance as it commemorates India becoming the fourth country to land on the moon and the first to reach its southern polar region on August 23, 2023. In honor of this monumental achievement, the Hon'ble Prime Minister Shri Narendra Modi declared August 23 as "National Space Day. The theme for this year's celebration, "Touching Lives while Touching the Moon: India's Space Saga," aptly captured the spirit of India's space journey and its profound impact on the nation and the world.

EVENT DETAILS

The event's highlight was a thought-provoking speech delivered by our esteemed convenor & HOD/EIE, Dr.T.Lakshmibai. Her speech provided an insightful overview of ISRO's journey from its humble beginnings to becoming a global leader in space technology. She eloquently discussed key milestones in ISRO's history, including the launch of the first Indian satellite, Aryabhata, in 1975, and the groundbreaking Mars Orbiter Mission (Mangalyaan) in 2013, which made India the first country to reach Mars on its maiden attempt successfully.

Following the speech, a quiz competition was held, continuing from the first round, which was conducted as an open-source quiz via Google Forms. Many students participated with great enthusiasm. Ch. Sai Phani Chandra, a final-year B.E. Mechatronics student, served as the host for the second-round quiz event. Twelve teams, each consisting of two members, competed in a quiz focusing on space achievements and the history of ISRO. The quiz was designed to test participants' knowledge of India's space endeavours and inspires them to explore the subject further. The questions covered a range of topics, including notable satellite launches, the evolution of India's space missions, and ISRO's role in global space exploration. The event was made successful through the contributions of final-year student Datta Sai and third-year students Sudhan and Hardik Srivatsa. The quiz saw enthusiastic student participation, with many showcasing a deep understanding of the subject matter. The event highlighted the importance of space research and inspired students to consider future careers in this exciting and ever-expanding field.

CONCLUSION:

Overall, the National Space Day event was a resounding success, leaving participants with a greater appreciation for India's contributions to space exploration and a renewed sense of curiosity about the universe beyond our planet.
