Report on the Achieving Success Through Hard Work.

Seminar by Dr. T.SUNDAR, A.P/EIE/ SCSVMV

Date: August 23, 2024

Venue: Library Second Floor, SCSVMV

Resource Person Speaker: Dr. T.SUNDAR, Assistant Professor, Department of Electronics and Instrumentation Engineering, SCSVMV Deemed University

Audience: CSE First-year Engineering students of Section C&D

Program: Student Induction Program 2024

Coordinators : Dr. R.Janani and Dr. N.C.A Boovarahan

Introduction

The Student Induction Program 2024 was conducted on August 23, 2024, for the first-year Computer Science and Engineering (CSE) students of Sections C & D at SCSVMV Deemed University. The session titled "**Achieving Success through Hard Work**" aimed to motivate the students and provide them with practical guidance on how to succeed in their academic and personal endeavors at the university.

Objective of the Program

The main objectives of the program were:

- To inspire first-year students to recognize the importance of hard work and perseverance in achieving success.
- To familiarize students with the university environment and introduce them to the academic culture at SCSVMV.

- To equip students with strategies for managing academic challenges and excelling in their studies.

Program Overview

The session was conducted by **Dr. T. Sundar**, Assistant Professor, Department of Electronics and Instrumentation Engineering. Dr. T. Sundar, with his extensive academic experience, shared valuable insights on the path to success, emphasizing the significance of consistent effort, discipline, and the right mindset.

Session Highlights

1. Introduction to Success

He defined success not just in terms of academic achievements, but also in personal growth, character development, and contributing to the community. He shared stories of successful individuals who achieved their goals through dedication and hard work.

2. The Role of Hard Work in Achieving Success

The speaker stressed that success does not come easily or overnight. Emphasized that consistent effort, setting clear goals, and remaining focused are key factors in achieving success. He highlighted the importance of discipline, time management, and prioritizing academic responsibilities to achieve long-term success.

3. Overcoming Challenges

Strategies for overcoming common challenges faced by first-year students, such as adjusting to the academic pressure, managing workload, and maintaining motivation. He encouraged students to view challenges as opportunities for growth and to adopt a positive attitude toward difficulties.

4. Time Management and Study Techniques

A significant portion of the session was dedicated to time management. He provided practical advice on how to balance academic, social, and personal life. He introduced study techniques like active learning, regular revision, and setting achievable goals to help students stay on track and perform better.

5. The Importance of Consistency

The speaker reiterated the value of consistency in both academics and personal development. Emphasized that achieving success requires small, steady steps taken over time. He advised students to develop a habit of working diligently every day, rather than cramming or procrastinating.

6. **The Power of a Positive Mindset**

The role of a positive mindset in achieving success. He encouraged students to maintain optimism, even in the face of setbacks, and to be resilient in their efforts. He highlighted that a positive attitude toward learning and self-improvement leads to better outcomes.

7. **Q&A Session**

Following the lecture, students were given the opportunity to ask questions about achieving success in their academic and personal lives. Dr. T. Sundar responded with practical and motivating answers, helping students gain clarity on how to tackle their challenges effectively.

Conclusion

The Student Induction Program 2024 session, titled "Achieving Success through Hard Work," was a highly beneficial and motivational event for the first-year CSE students. Dr. T. Sundar insightful guidance and emphasis on discipline, perseverance, and a positive mindset left a lasting impression on the students.

The session helped students understand the importance of consistent effort and provided them with practical strategies to navigate the challenges of university life. The program inspired the students to approach their studies and personal growth with dedication and focus, setting them on a path toward success during their time at SCSVMV.

Achieving Success through Hard Work **Speech Content**

Hard work when you are in this institution he also mention the crucial role of Education in shaping your future and by virtue of your hard work you can make a career that will be rewarding.

I request all the students who have come here to join in this institution to take his advice sincerely as it emanates from a person who has achieved so many things in his life and work hard every minute to reach your destination.

It is very important to know that the journey is equally important many a person think of the destination as the ultimate objective in the life and in the process they fail to enjoy their lives. I would request you to enjoy every minute in this institution.

If you start enjoying the education it will become a joy for you and every moment will become a bliss when you are able to dispel the darkness by virtue of the light of wisdom that you are going to gain in this institution it is going to be a pleasant journey.

communication is 90% listening and 10% talking today listening is often called as the Forgotten skill as it is said by shakespeare in his Henry there is a character called FAL staff who says that I suffer from the disease of not listening many a time we find people who suffer from the disease of not listening another important aspect that he mentioned is about missing.

Breakfast I'm reminded of the portraits in the libraries of the United States of America they will have Jefferson Lincoln Washington and Benjamin Franklin and written below that all these great men never missed breakfast breakfast is extremely important for one reason that you have long hours of fasting after your dinner and if you skip your breakfast your brain will be longing for glucose and if it doesn't get proper glucose you will become tired and you will not be able to listen to the classes the third important aspect that he said is about postponing the easiest works and attending to the difficult works these three important aspects are very very crucial in shaping your future.

Work hard so that your parents who have come here will feel happy the school from which you have come here will feel happy.

Salary is not important remuneration is not important but acquiring knowledge is very very important if you are well in your subject the whole world will be after you.

I will tell you that there are a few aspects which are very very important as a fresher to understand grasp and follow the first language skills are very very important for any course that you go that you have joined here language skills can be developed only in the college because by interacting with the students from various States you can develop the language skills.

life skill you should be aware of your own self you should develop communication capabilities you should have emotional intelligence you should have problem solving capabilities you should have decision making you should have empathy and all these skills are very very important for you to shine in your life.

The next skill that is very very important is the analytical skill in the schools most of the time it would be a memory based education but when you join the university you to analyze you to understand grasp and apply knowledge is just knowing alone is not going to be important so it is very very important that you read understand and see how it could be applied in day-to-day life the next important thing is discipline in schools you would have been conditioned most of the time in schools you come across your homogeneous population all the students from the same area they speak the same tongue most of them have the same culture they have the same economic background but in the college you have children from various backgrounds from diverse economic situations therefore it is very very important that conditioning is not going to be helpful in the

college you should be self- disciplined every walk of your life dependent on others as well as your parents the next important thing is to expand your knowledge this is the time you go for reference books read lot.

I have heard that there is one country called Bhutan which has got carbon negativity not carbon neutral but carbon negativity it is mainly because of the environmental conditions in Bhutan therefore the students who have joined the science disciplines have to work on this ecological intelligence how to work on this climate crisis and that is very very important the next important thing that I would advise all of you is to make your life a great pilgrimage of knowledge in this institution if you are going to do this from day one onwards your life is going to be smooth there are three types of time the long time middle time and end

time your long time starts when the college opens if you are able to manipulate your long time effectively when you start your studies on the very first day of your college it's going to be like a game it's going to be like a play If you are going to start your studies in the middle time it is going to be tedious you will not be able to achieve Greater Heights in your life if you start preparing at the end time it will be ous strenuous cumbersome and almost not possible therefore you are now at the edge of the long time make use of every minute that you are going to have in this institution productively economically and judiciously when you come out of this institution all of you should come out with flying colors and make a significant contribution to this nation with these few words.

I congratulate you all because you have all joined this institution only because of the hard work that you have done for the past 14 years in your life when a tree blossoms and if somebody inquires what is the age of the flower it is not one day or two day it starts from the day you planted the tree similar for you have done 14 years of hard work starting from your lkg and now you have come into a prestigious institution. so I congratulate all of you for the hard work that you have done so far and I am sure that you will continue to do the hard work so that you can make a mark in this Society thank you very much.
